```java
package ProjectEx;
import java.util.*;
public class Email {
    public static void main(String[] args) {
        String MailId[] =
{"abc@gmail.com","def@gmail.com","ghi@gmail.com","jkl@gmail.com","m
no@gmail.com","pqr@gmail.com","stu@gmail.com","vw@gmail.com","xyz
@gmail.com"};
        ArrayList<String> MailList = new
ArrayList<String>(Arrays.asList(MailId));
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter the mail id:");
        if(MailList.contains(sc.next()))
            System.out.println("The Email is Present");
        else
            System.out.println("Not present in the list");
    }
}
```
